## HEALTHCARE

---

Whatever you need, we know the value of partnership, precision and quality is what delivers Solutions That Matter. Our proven process validates every step to guarantee IntraPac Healthcare provides the highest quality products. Our technical support, program management team, and rapid response ensures your project meets each critical detail.

State-of-the-Art two and three shot precision injection molding equipment enables us to execute on the most intricate and complex projects. In-house design, resin expertise, and clean room facilities all lend to ensure no phase is overlooked.

## IN-HOUSE CUSTOM DESIGN AND TOOL BUILDING SUPPORT

IntraPac's team works closely with our customers to provide custom, precision injection molded solutions. We support all phases of product development from initial concept through full-scale production. We utilize a hands-on approach to work with our customers for optimization of part design, to enhance moldability and part performance. IntraPac uses the latest design and pre-production prototype options to refine our customer's concept and identify potential production challenges. In addition, we offer many value-added services and tooling options to ensure our customers achieve their product goals.

Resin Expertise- all thermoplastics	Engineering Solutions
Tool Building Technology	Process Development
Multi-Shot Injection Molding (Two & Three Shot)	Quality Management
	Insert Molding

## SECONDARY OPERATIONS

Automated & Manual Assembly	Adhesive Assembly
Special Packaging & Labeling	Silicone Assembly
Ultrasonic Welding	Heat Staking
	Pad Printing

## CERTIFICATIONS

ISO:9001 Certification	21 CFR 820 Compliant for Medical Device Design and Manufacturing
ISO:13485 Certification	
FDA Registered Manufacturing Facility	

## MANUFACTURING CAPABILITIES

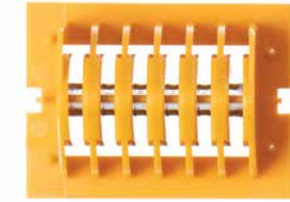

Injection Molding Machines 50-400 ton	Clean Room Facilities ISO 8 – Class 100,000
Tin Tube Lines	Automated and Manual Systems Compliant to Customer Requirements
Metered Dose Inhaler Coating Lines	Direct Market Unit Assemblies are Packaged and Shipped to Customer Distribution Sites
Secondary Assembly Facilities	
White Room Facilities	

## PRACTICES & PROCEDURES

Statistical Process Control	Advanced Product Quality Planning (APQP)
Mold Flow Analysis	Solid Works CAD
Lean Manufacturing	Preproduction Prototype/ 3D Printing
Full Validation & Verification (IQ / OQ / PQ)	
Design of Experiments (DOE)	

For superior quality, complete project management, technical and industry experience, IntraPac has expertise in product design and development, combining principles of plastic part design and engineering tools to create and analyze complex plastic components and assemblies.

IntraPac produces precision molding Solutions That Matter.
